Electrical Safety Certificates

**Please see inside front cover for important information
for the electrical contractor**

Issued by:
EnergySafety WA

Important information for the electrical contractor/ authorised¹ electrician

Regulation 52B of the *Electricity (Licensing) Regulations 1991* requires an electrical contractor who carries out any electrical installing work to complete a certificate of compliance. This does not apply to in-house electrical installing work carried out under the authority of an in-house electrical installing work licence.

An Electrical Safety Certificate is the certificate of compliance referred to in Regulation 52B of the *Electricity (Licensing) Regulations 1991*.

Electrical Safety Certificates warrant that the electrical installing work described in the certificate is safe and complies with the *Electricity (Licensing) Regulations 1991*.

An example of a completed Electrical Safety Certificate is shown on the press sheet of this book of Certificates.

Electrical Safety Certificates have a unique identification number.

Duty of electrical contractors

An electrical contractor carrying out any electrical installing work must, within 28 days of completing the work, provide a completed Electrical Safety Certificate in respect of the work to the person for whom the work was carried out, in accordance with Regulation 52B(1) of the *Electricity (Licensing) Regulations 1991*.

The **electrical contractor** who carried out the electrical installing work is required to complete the Electrical Safety Certificate.

¹ Electrical contractors may **authorise** an **employee electrician** to complete and sign the Electrical Safety Certificate on their behalf. The 'authorised electrician' must be **authorised in writing** by the electrical contractor, in accordance with Regulation 52B(5).

The Contractor's Copy of the completed Electrical Safety Certificate is to be retained by the electrical contractor for a period of five years, in accordance with Regulation 52B(2).

Details of work completed

In the section "Details of work completed", a general description of the work must be provided, for example "Existing domestic installation rewired", "Two additional power circuits added to shop installation", "Wiring of new second storey to residence", "New sub mains and shed wiring installed at farm".

Further detail of the electrical installing work completed **must also** be provided in the boxes "Lights", "Socket Outlets", "Cooking Appliances" etc, indicating the number or rating as appropriate.

Important

A person who knowingly provides false or misleading information on an Electrical Safety Certificate commits an offence, pursuant to Regulation 52B(7).

Certificate number **AA**

ELECTRICAL SAFETY CERTIFICATE

Electricity (Licensing) Regulations 1991, Regulation 52B

This certificate warrants that the electrical installing work described below is safe and complies with the *Electricity (Licensing) Regulations 1991*.

This Electrical Safety Certificate is the certificate of compliance referred to in Regulation 52B of the *Electricity (Licensing) Regulations 1991*. This regulation requires that the electrical contractor/authorised¹ electrician completing electrical installing work must, within 28 days of completing the work, provide a certificate of compliance in respect of the work to the person for whom the work was carried out.
